As a Professional Trucker I really appreciate the value of XM Radio. I can travel the country and concentrate on my driving while enjoying quality entertainment without having to take my eyes off the road to search for a clear channel. The weather information I receive on XM is very important to me and the constant traffic reports save me time and fuel. I believe XM has the right to provide these services and I have the right to purchase them.

My family, friends and I will be following the results of your investigation.
